

# Dynamics AX Application Connector

**Connect anything. Master everything.**

## Dynamics AX Aware

- Supports common domains
- Full CRUD functionality

## Codeless Configuration

- Bi-directional data mappings
- No development required

## Batch Processing

- Run on demand
- Schedule via command line

## Real-time integration

- Integrates with Event Management
- Supports bi-directional integrations

When delivering an MDM solution, integration is often cited as one of more complex components of the implementation. Using Integrator, and the Dynamics AX Application Connector, quickly and easily configure integrations between Profisee and Dynamics AX\*, enabling real-time synchronization of key master data domains within AX as they change.

## Enhance your Dynamics AX solution with an enterprise grade MDM platform.

ERP platforms focus first on supporting key business processes, with an emphasis on ensuring necessary information is captured to complete critical business transactions. With business users focused on getting the job done, duplicate and poor quality master data is often the result.

The Application Connector for Dynamics AX makes it fast and easy to integrate common data domains within your Dynamics AX data with the Profisee MDM platform, where it can be matched to data from other systems or extended to support reporting and analytics. The Connector includes native support for the following data domains:

- Customer
- Vendor
- Address
- Person
- Organization
- Product (Item Master)

Each deployment of the connector can be configured to support customizations and additional domains as a part of the connector deployment.\*\*

*\*Compatible with Dynamics AX 2012 R3*

*\*\*Requires Profisee Professional Services*

***Integrate Profisee with Dynamics AX to better manage your key business data.***

The Fastest Growing and #1 Time-To-Value MDM Platform
